### Specifications

Spherical shape constructed from open-cell polyurethane foam. A high-grade abrasion and chemical resistant polyurethane elastomer coating can be applied in double spiral design and can be equipped with silicon carbide, steel wire brushes or plastic bristles.

### Applications

Used for regular wiping, drying, cleaning, batching operations, and product removal in the oil and gas, municipality, mining, food and beverage, chemical and petrochemical, cosmetic and pharmaceutical, and other various processing industries. Able to negotiate tight-radius bends and be mechanically launched with specially designed sphere launchers.

### Options

5 - 7 pound (models SPH-5B, SPH-5C, SPH-5S, SPH-5W, SPH-5P), and 8 - 10 pound (models SPH-8B, SPH-8C, SPH-8S, SPH-8W, SPH-8P) foam density; totally coated; varying coating patterns; loose silicon carbide grit or bonded straps; carbon steel or stainless steel wire, or plastic bristle; varying gauges of wire and bristles; magnets; customized diameters for special pigging applications.
