Specifications

Constructed of high-grade abrasion and chemical resistant solid-cast material. Inflatable type has hollow core with inflation device, and can be filled with liquid and pressurized up to 2% of standard diameter for proper fit in pipeline. 2" through 6" are available in solid type and 6" through 48" are available in inflatable type.

Applications

Primarily used for meter proving in the oil and gas industry. Also for hydrostatic testing, batching and product removal. Able to negotiate tight-radius bends and be mechanically launched with specially designed sphere launchers.

Options

Polyurethane, neoprene, viton, epdm, buna-n or other elastomer compounds for special services; varying durometers (hardness); sphere-filling pump and accessories; customized sizing for special pigging applications.
