Specifications

Carbon-steel body equipped with easily replaceable cups and brushes mounted on wear-compensating springs, providing 360° coverage of internal pipe surface. Capable of being fitted with gauging plate machined to specifications. 16" through 48" are bolting pattern configuration.

Applications

Used during pre-commission and on-stream cleaning where rust, millscale, sand, wax, organic growth, mud, oxides, and other foreign matter exist. Equipped with gauging plate, used to prove pipe roundness and to ensure excessive weld penetration or debris does not exist. Also used to prove minimum bend radius prior to intelligent pig use.

Options

Carbon steel, stainless steel, or aluminum body; cups manufactured from polyurethane, neoprene, viton, epdm, buna-n or other elastomer compounds for special services; carbon-steel, stainless steel, prostran brushes or polyurethane blades; leaf or flat spring design; aluminum or steel gauging plate of varying thickness, with or without slots; two-cup, three-cup or four-cup pig design; transmitter or plunger cavity; magnets; configurations can be modified to include discs for increased sealing capabilities (LRB model is bidirectional with discs); customized dimensions for special pigging applications.
